Broadcom BCM57508 200GbE Controller - DATASHEET

Manufacturer: Broadcom
Part Number: BCM57508
Category: Network / Network Controller
Document Revision: Rev A1
Language: en

Overview

The Broadcom BCM57508 NetXtreme-E is a 200 Gigabit Ethernet controller supporting 1x 200GbE, 2x 100GbE or 4x 50GbE via QSFP56. Built for hyperscale cloud and enterprise data centers, it provides RoCE v2 RDMA, VXLAN/GENEVE tunnel offloads, SR-IOV with up to 1,024 virtual functions and TruFlow flow processing. Host interface: PCIe Gen4 x16.

Key Specifications Summary

speed: 200GbE. pcie: gen4x16. sriov: 512VFs. offloads: TLS_IPsec. ports: 2x100G_or_1x200G.
