Micron DDR5 SDRAM 32Gb Datasheet - DATASHEET

Manufacturer: Micron
Part Number: MT60B4G8HB-48B
Category: Memory / DDR5 SDRAM
Document Revision: Rev A
Language: en

Overview

The Micron MT60B4G8HB-48B is a 32 Gb DDR5 SDRAM component (4G x8) for server and client memory modules. Operates at 1.1V VDD/VDDQ with on-die ECC for improved data integrity. Features decision feedback equalization (DFE), two independent bank groups per channel and JEDEC DDR5 compliance at speeds up to 4800 MT/s.

Electrical Specifications

VDD/VDDQ: 1.1V. VPP: 1.8V. Speed grade: DDR5-4800B, CL40-39-39. Density: 32 Gb, x8 organization. On-die ECC: single-bit correction per 128-bit word. Refresh: same-bank refresh supported. Package: 78-ball FBGA. Operating temperature: 0 to 95 degrees C.

Key Specifications Summary

capacity: 32Gb. speed: 4800MT. voltage: 1.1V. banks: 32. burst: BL16. ecc: on_die.
