MPU-6050 Six-Axis MEMS MotionTracking - DATASHEET

Manufacturer: InvenSense (TDK)
Part Number: MPU-6050
Category: Sensor / IMU 6-Axis
Document Revision: Rev 4.2
Language: en

Overview

The MPU-6050 is the world first integrated 6-axis MotionTracking device combining a 3-axis gyroscope, 3-axis accelerometer, and a Digital Motion Processor (DMP) in a 4×4×0.9mm QFN package. Gyroscope: programmable full-scale range ±250, ±500, ±1000, ±2000 °/s. Accelerometer: programmable full-scale range ±2g, ±4g, ±8g, ±16g. I2C interface up to 400 kHz. Auxiliary I2C for external magnetometer.

Key Specifications Summary

gyro: 250-2000dps. accel: 2-16g. dof: 6axis. dmp: yes. interface: I2C_400kHz. size: 4x4mm.
