Samsung HBM3 DRAM Specification - DATASHEET

Manufacturer: Samsung
Part Number: H3A8G32AMR
Category: Memory / HBM3
Document Revision: Rev 1.0
Language: en

Overview

The Samsung H3A8G32AMR is an HBM3 (High Bandwidth Memory gen 3) stack with 24 GB capacity in a 12-high TSV configuration. Delivers up to 819 GB/s bandwidth per stack at 6.4 Gbps per pin over a 1024-bit interface. Designed for AI accelerators, HPC GPUs and network processors integrated via 2.5D silicon interposer.

Key Specifications Summary

capacity: 24GB_stack. bw: 819GBs. layers: 12Hi. voltage: 1.1V. interface: 1024bit.
