Intel Agilex 7 FPGAs and SoCs Data Sheet - DATASHEET

Manufacturer: Intel
Part Number: AGFB014R24A
Category: FPGA / High-Performance FPGA
Document Revision: Rev 3.0
Language: en

Overview

The Intel Agilex 7 F-Series FPGA AGFB014R24A is built on Intel 7 process technology. It provides about 1.4 million logic elements, more than 4,500 variable-precision DSP blocks and hardened PCIe Gen4 x16. Targets network infrastructure, data center acceleration, wireless and signal processing applications.

Transceiver Specifications

Up to 96 transceivers supporting 58 Gbps PAM4 and 32 Gbps NRZ. Hardened 400GbE and 100GbE MAC with RS-FEC. External memory interfaces: DDR4, DDR5, QDR-IV. GPIO: up to 624 user I/O. Package: 2486A FBGA. Speed grade: -2. Operating range: 0 to 100 degrees C junction.

Key Specifications Summary

logic_cells: 1400K. bram: 200Mb. dsp: 6480. transceivers: 72. speed: 116Gbps. process: intel7. pcie5: yes.
