AMD Instinct MI300X Accelerator - DATASHEET

Manufacturer: AMD
Part Number: MI300X
Category: GPU / Data Center GPU
Document Revision: Rev A
Language: en

Overview

The AMD Instinct MI300X is a data center GPU accelerator built on the CDNA 3 architecture. It features 192 GB of HBM3 memory with 5.3 TB/s peak memory bandwidth, the largest memory capacity in a single accelerator. Designed for large language model training and inference, with AMD Infinity Fabric links for multi-GPU scaling up to 8 GPUs.

Compute Specifications

Compute units: 304. Stream processors: 19,456. Peak FP64: 81.7 TFLOPS. Peak FP32: 163.4 TFLOPS. Peak FP16/BF16 matrix: 1,307 TFLOPS. Peak FP8: 2,615 TFLOPS. HBM3: 192 GB, 5.3 TB/s. TDP: 750W. Host interface: PCIe Gen5 x16. Form factor: OAM. Software: ROCm open software stack.

Key Specifications Summary

memory: 192GB_HBM3. bw: 5300GBs. fp64: 81.7TF. fp32: 163.4TF. fp16: 1307TF. tdp: 750W. pcie: gen5.
